INVESTING IN CALIFORNIA'S WATERSHED

SIERRA NEVADA CONSERVANCY'S PROPOSITION 84 GRANT PROGRAM

More than 60% of the state's developed water supply originates in the Sierra Nevada Region, and up to half of the water flowing into the Delta starts its journey in the Sierra's forested watersheds.

Over the past six years the Sierra Nevada Conservancy has successfully awarded over \$50 million through the Proposition 84 Grant Program, investing in projects that directly improve watershed health, water quality, and community health for the betterment of the people of California. Investing in California's Watershed provides a synopsis of the grant program using 10 highlighted sample projects in the five key areas of investment. Watch this video providing an overview of the program.

To explore the relationship between Sierra Nevada watersheds, use of the water, and the investments made by the Sierra Nevada Conservancy to protect and improve the Region, click on our interactive watershed map.

KEY AREAS OF INVESTMENT with sample project videos:

Forest Health and Fire Prevention – Sierra forests are the source of most of California's water. Funds from the Proposition 84 Grant Program supported projects that reduced the risk of large damaging wildfires that threaten communities, water reliability, and quality for Californians, and at the same time, created much needed jobs.

American River Shaded Fuelbreak

Calaveras Healthy Impact Product Solutions

Watershed Health – The health of the watershed is directly linked to the quality and amount of water that
